Contents

SESSION I: Genetic diversity of gut bacteria

Novel groups of culturable bacteria are numerically abundant in the porcine gastrointestinal tract JENSEN B.B., MIKKELSEN L.L., HOJBERG O.	S3
Development of a microarray for structural analysis of pig gastrointestinal bacterial communities LESER T.D., BOYE M., AMENUVOR J.Z., JENSEN T.K., MØLLER K.	S3
Chicken gut bacteria: ecological studies and beyond GONG J.	S3
The effect of condensed tannins from <i>Acacia angustissima</i> on bacterial diversity and metabolic activity in the rat gastrointestinal tract SMITH A.H., MACKIE R.I.	S4
Development of oligonucleotide probes to detect and quantify the numbers of potential butyrate-producing bacteria present within the human faecal flora SCHWIERTZ A., HOLD G.L., BLAUT M., DUNCAN S.H., FLINT H.J.	S4
Comparison of DNA extraction and purification procedures for luminal samples from the gastrointestinal tract ANDERSON K.L.	S5
Examination of changes in the gut microflora using DGGE and T-RFLP BERNBOM N., SAADBYE P., NØRRUNG B.	S5
Influence of dietary changes on human colonic bacteria in an anaerobic fermentor system DUNCAN S.H., SCOTT K.P., RAMSAY A.G., STEWART C.S., HARMSSEN H.J.M., WELLING G.W., FLINT H.J.	S5
Use of odd-chain fatty acid profiles to study microbial colonisation of boli from freshly ingested herbage KIM E.J., TWEED J.K.S., DEWHURST R.J., MERRY R.J., DAVIES D.R., THEODOROU M.K.	S6
Bacterial translocation in weaning piglets analysed by 16S rDNA based approaches KONSTANTINOV S.R., LESER T.D., AKKERMANS-VAN VLIET W.M., WILLIAMS B.A., DE VOS W.M., AKKERMANS A.D.L.	S6
Taxonomy and role of <i>Butyrivibrio</i> and <i>Pseudobutyrvibrio</i> species in microbial ecosystem from the digestive tract of ruminants KOPEČNÝ J., MARINŠEK-LOGAR R.	S7
Molecular ecology of <i>Oscillospira guillermondii</i> – a large, morphologically conspicuous, but uncultured rumen bacterium MACKIE R.I., AMINOV R.I., HU W., OLSEN M.A., KLIEVE A.V., KAMAGATA Y.	S7
Development of a competitive PCR for detection and enumeration of <i>Butyrivibrio</i> and <i>Pseudobutyrvibrio</i> strains in the rumen ecosystem MRÁZEK J., KOPEČNÝ J., AVGUŠTIN G.	S8

An optimised RNA extraction protocol for rumen samples MUETZEL S., BECKER K.	S8
Culture independent molecular analysis of the elderly faecal microflora reveals an extreme complexity SAUNIER K., TUOHY K., SUTREN M., CRESCI A., DORÉ J.	S8
Physiological affiliations of <i>Dorea longicatena</i> gen. nov., sp. nov. in gastrointestinal ecology TARAS D., BLAUT M.	S9
Isolation and characterization of ammonia-hyperproducing bacteria from stored swine manure WHITEHEAD T.R., COTTA M.A.	S9

SESSION II: Manipulation of microbial activities

The bacterial community in the ileum of broiler chickens at various ages is influenced by dietary fat source and subtherapeutic levels of antibiotics KNARREBORG A., SIMON M.A., ENGBERG R., JENSEN B.B., TANNOCK G.W.	S13
Effect of a live yeast culture on cellulolytic activities of liquid and solid associated microorganisms in the equine hindgut ecosystem MEDINA B., JACOTOT E., BERTIN G., JULLIAND V.	S13
Natural immune responses in sheep to methanogenic archaea HOLLOWAY P.E., BAKER S.K.	S13
Bacterial flagellin, but not LPS, is required for the induction of human beta-defensin 2 in human intestinal and gastric epithelial cells O'NEIL D.A., CONWAY S., GRANT G., GARDEN K.E., LOGAN E.T., WILSON D., KELLY D. .	S14
Bifidobacteria upregulate Toll-like receptor 3 mRNA levels in epithelial cells FURRIE E., MACFARLANE S., MACFARLANE G.T.	S14
Caecal microflora of growing-rabbits affected by a non specific enteropathy BENNEGADI N., FONTY G., MILLET L., GIDENNE T., LICOIS D.	S15
Feed structure and processing and addition of formic acid to the feed influences the microbial ecology of the gastrointestinal tract of pigs CANIBE N., JENSEN B.B.	S15
Survival of microorganisms after exposure to organic acids CANIBE N., JENSEN B.B.	S16
Functional cell model of non-tumorigenic intestinal epithelial cells IPEC-J2 to study probiotic-pathogen-gut epithelium interactions CENCIC A., JAKOBSEN M.	S16
<i>Butyrivibrio</i> sp. Strain Mz5 – a possible probiotic candidate for monogastric animals CEPELJNIK T., ZOREC M., NEKREP F.V., MARINSEK-LOGAR R.	S16
Identification and characterisation of bacteria in the gut flora of neonates COOKE G., COSTELLO M., BEHAN J.	S17

The influence of <i>Lentinus edodes</i> preparations on bacteriological and morphological aspects of the small intestine in piglets DECUYPERE J.A., VAN NEVEL C.J., DIERICK N., MOLLY K.....	S17
Medium chain fatty acids as a nutraceutical alternative for in-feed antibiotics in piglet nutrition DIERICK N., DECUYPERE J., MOLLY K., VAN BEEK E., VANDERBEKE E.....	S18
Intestinal bacteriological changes in piglets after weaning onto a diet based on wheat FAVIER C., LALLÈS J.P., SÈVE B.	S18
Infiltrating polymorphonuclear leukocytes in ulcerative colitis have an enhanced response to members of the normal microbiota due to enhanced antibody response towards cell surface structures of these bacterial species FURRIE E., MACFARLANE S., MACFARLANE G.T.	S19
Factors affecting intestinal flora construction in infant rat INOUE R., USHIDA K.	S19
Development of probiotics for canine and feline nutrition KNORR R., PRAPLAN F., ROUSSEAU V., CAVADINI C.	S20
Receptors recognized by bifidobacteria on intestinal epithelial cells KOSTRZYNSKA M., DIXON J., LEPP D.	S20
Comparison of the effects of adding antibiotic or probiotic as growth promotor in ration on broiler performance MODIRSANEI M., KIAEI S.M.M., FARKHOY M.....	S20
The effect of feed form on the microflora at the terminal ileum of the young pig MORAN C.A., BROOKS P.H.	S21
Functional foods as a tool to modulate the gastrointestinal ecology and reduce antimicrobials used in broiler chicken diets NAVA G., LEDESMA N., HARGIS B., DONOGHUE A., TELLEZ G.	S21
Transition of probiotic bacteria, <i>Lactobacillus casei</i> strain Shirota, in gastrointestinal tract of pigs OHASHI Y., INOUE R., USHIDA K.	S21
Modulation of piglet gut microflora post-weaning PICKARD J.A., DODD C.E.R., WISEMAN J.....	S22
Microbial changes in liquid piglet feed formulations PLUMED C., PAGÈS M., VON WRIGHT A.	S22
Immunisation of mice with <i>Lactobacillus plantarum</i> NCIMB8826 expressing the antigen UreB of <i>Helicobacter pylori</i> : evaluation of stability of the recombinant strain and its immunogenicity for vaccine development ROUSSEL Y., GRAMMATIKAKI M., BEUGNET A., WILKS M., TABAQCHALI S.	S23
Development of probiotic strains for pet food SIMMERING R., BENYACOUB J., KNORR R., VON-DER-WEID T., CAVADINI C., ROCHAT F.	S23
Effects of an oregano-based feed additive on the porcine intestinal microflora in vitro VELIGRATLI E., HILLMAN K., STEFOPOULOU S., FOWLER V.R.	S23

SESSION III: Pathogens and antibiotic resistance transfer

Transfer of antibiotic resistance genes between gut bacteria – Are gut bacteria reservoirs for resistance genes? SALYERS A.A.	S27
Evolutionary and ecological implications of antibiotic resistance AMINOV R.I., CHEE-SANFORD J.C., GARRIGUES N., KRAPAC I.J., MACKIE R.I.	S27
Identification of novel ribosome protection type tetracycline resistance genes <i>tet(W)</i> and <i>tet(32)</i> , amongst predominant gut commensal anaerobes SCOTT K.P., MELVILLE C.M., MULLANY P., FLINT H.J.	S27
Molecular characterisation of Shiga-toxin producing <i>Escherichia coli</i> isolated from cattle, food and patients in Central France LIVRELLI V., PRADEL N., BERTIN Y., BOUKHORS K., BANCHET N., MARTIN C.	S28
A role for lipopolysaccharide (LPS) but not intimin in <i>Escherichia coli</i> O157:H7 persistence in a specific pathogen free (SPF) chick model BEST A., LA RAGIONE R.M., O'CONNOR C.D., WOODWARD M.J.	S28
Interactions of probiotic bacteria and <i>E. coli</i> in the intestinal tract of young animals BOMBA A., NEMCOVÁ R., GANCARCÍKOVÁ S., MUDROŇOVÁ D., PECÚCH P., HERICH R... ..	S29
Restriction endonucleases from ruminal strains of the genus <i>Prevotella</i> ACCETTO T., AVGUŠTIN G.	S29
Enteric viruses as quality markers for natural drinking water sources of dairy cattle BECKER P.M., OUDE ELFERINK S.J.W.H., MEIJER G.A.L.	S30
Subtyping of virulence factors in Shiga toxin-producing <i>Escherichia coli</i> (STEC) isolated in France from healthy cattle and food products BERTIN Y., BOUKHORS K., LIVRELLI V., PRADEL N., MARTIN C.	S30
Role of the Shiga toxin in the ecology of <i>Escherichia coli</i> O157:H7 CORNIC N.A., MOON H.W.	S30
Use of green fluorescent protein as a visual marker EKINCI M.S., SCOTT K.P.	S31
Screening of lactic acid bacteria from ruminant gastrointestinal tract for inhibitory activity against <i>Escherichia coli</i> GOUGH J.M., CONLAN L.L., KRAUSE D.O., SMITH W.J.M., MCSWEENEY C.S.	S31
Antimicrobial properties of dietary potassium diformate in pigs GRANLI T., ØVERLAND M., KJELDSSEN K.C., MROZ Z.	S32
Salmonellosis in the rat: a model for gastroenteritis-type infection? GRANT G., DUNCAN M., ROBERTSON J.M.C., NAUGHTON P.J.	S32
Interactions between pathogenic and probiotic bacteria in the porcine intestinal microflora via quorum-sensing mechanisms HILLMAN K.	S32
Post mortem evolution of the concentration of <i>Clostridium perfringens</i> in the bovine digestive tract JULLIAND V., PHILIPPEAU C., REIBEL C., GONCALVES S., POPOFF M.R.	S33

The use of Lactobacilli as a competitive exclusion agent for control of bacterial pathogens in poultry LA RAGIONE R.M., NARBAD A., HORN N., EVANS H., GASSON M.J., WOODWARD M.J...	S33
<i>Escherichia coli</i> O157 and non-O157 isolates are more susceptible to L-lactate than to D-lactate MCWILLIAM LEITCH E.C., STEWART C.S.	S34
The role of protozoa in the survival of <i>E. coli</i> , Verocytotoxin encoding bacteriophage and their VTEC lysogens in the rumen MCINTOSH F.M., STANLEY K.N., STEWART C.S., NEWBOLD C.J.	S34
A novel conjugative transposon, TnB 1230, is responsible for the transmissible tetracycline resistance between strains of <i>Butyrivibrio fibrisolvens</i> MELVILLE C.M., MULLANY P., FLINT H.J., SCOTT K.P.	S35
A bioreactor system to study the survival of <i>Salmonella</i> in pig gut content NAUGHTON P.J., JENSEN B.B.	S35
Mutations in a bacterial host affecting CAT-mediated chloramphenicol resistance mechanism POTRYKUS J., WĘGRZYN G.	S35
DNA modification in rumen bacteria – occurrence of Dam and Dcm modification PRISTAŠ P., NEUZILOVA M., JAVORSKÝ P.	S36
<i>Salmonella enterica</i> serovar Enteritidis: involvement of flagella and fimbriae in infection of the rat ROBERTSON J.M.C., MCKENZIE N.H., DUNCAN M., ALLEN-VERCOE E., WOODWARD M.J., FLINT H.J., GRANT G.	S36
The effect of “propolis-ginseng” extracts in anti- <i>Helicobacter pylori</i> therapy SIDOROV A.I., SULMAN E.M., SMIRNOVA L.E., VINOGRADOV V.F.	S37
Antibacterial effect of fatty acids on <i>Escherichia coli</i> SKŘIVANOVÁ V., MAROUNEK M.	S37
Transfer and survival of verocytotoxin encoding bacteriophage in the ruminant gut STANLEY K.N., JAMES C., ALLISON H., SAUNDERS J., MCCARTHY A., FLINT H.J., STEWART C.S.	S37
Use of fermentable fibre in diets for weaning piglets TAGLIAPIETRA F., BONSEMBIANTE M., SCHIAVON S., BAILONI L.	S38
Identification of tetracycline resistance determinants in <i>Salmonella</i> within swine production facilities in Illinois TEFEREDEGNE B., BARBER D.A., ISAACSON R.E., WEIGEL R.M., WHITE B.A.	S38
Distant interactions regulating bacterial growth TRUSHIN M.V., SYOMINA I.G., CHERNOV V.M.	S39
Colonization and transformation capacity of <i>Acinetobacter calcoaceticus</i> and <i>Bacillus subtilis</i> in the intestinal tract of gnotobiotic rats WILCKS A., JACOBSEN B.L.	S39
Suppression of enterotoxigenic <i>E. coli</i> population in piglet intestines by a <i>Bacillus</i> probiotic ZHAO L., SUN L., SONG G., WEI G.	S39

SESSION IV: Fermentation (1) – substrate breakdown

Cellulosome organisation in <i>Ruminococcus flavefaciens</i> 17 involves multiple dockerin-binding specificities McCRAE S.I., RINCON M.T., DING S-Y., LAMED R., MARTIN J.C., AURILIA V., SHOHAM V., BAYER E.A., FLINT H.J.	S43
Adhesion to cellulose of the Gram-positive rumen bacterium <i>Ruminococcus albus</i> involves type IV pili RAKOTOARIVONINA H., JUBELIN G., GAILLARD-MARTINIE B., FORANO E., MOSONI P.	S43
Proteomics-based analysis of <i>Ruminococcus albus</i> 8 adhesion-defective mutants DEVILLARD E., GOODHEART D., MORRISON M.	S43
The <i>Fibrobacter succinogenes</i> strain S85 genome sequencing project NELSON K., AMINOV R., FORSBERG C., MACKIE R.I., RUSSELL J.B., WHITE B.A., WILSON D.B., MULLIGAN S., TRAN K., CARTY H., KHOURI H., NELSON W., DAUGHERTY S., FRASER C., MORRISON M.	S44
Identification of functional gene subsets from the cellulolytic organism <i>Ruminococcus flavefaciens</i> using a comparative genomics approach ANTONOPOULOS D.A., WHITE B.A.	S44
Characterization of a family 11 carbohydrate-binding module from CelJ: importance of the CBM to cellulose hydrolysis ARAI T., KARITA S., KIMURA T., SAKKA K., OHMIYA K.	S45
In vitro fermentability of carbohydrates by faecal microflora of pigs at weaning BOSCH M.W., WILLIAMS B.A., BOX L.W., VERSTEGEN M.W.A.	S45
Concurrent maltodextrin and cellodextrin synthesis by <i>Fibrobacter succinogenes</i> S85 as identified by 2D NMR DELORT A.-M., MATULOVA M., NOUAILLE R., GAUDET G., FORANO E.	S46
Degradation of cellulose and ¹³ C-enriched lignocellulosic fibres by <i>Fibrobacter succinogenes</i> S85. A liquid and solid state NMR study DELORT A.-M., NOUAILLE R., MATULOVA M., FORANO E.	S46
Genetic transformation and expression in mutant bacteria EKINCI M.S., BUYUKCELİK M., KAMALAK A., GURBUZ Y., OZKOSE E.	S47
Effects of a methanogen on the lignocellulolytic ability of gut anaerobic fungi from different herbivores JOBLIN K.N., NAYLOR G.E.	S47
Ability of the rumen bacterium <i>Treponema</i> strain kT to utilize fructose and fructose polymers for growth KASPEROWICZ A., MICHAŁOWSKI T.	S47
Competitive PCR-aided monitoring of cellulolytic bacterial species attaching to orchardgrass hay incubated in the rumen KOIKE S., KOBAYASHI Y., TANAKA K.	S48
Activity of pectin-degrading enzymes in rabbit caecal strains of <i>Bifidobacterium pseudolongum</i> , and in rumen bacterium <i>Streptococcus bovis</i> MAROUNEK M., SLOVÁKOVÁ L., DUŠKOVÁ D.	S48

Expression of cellulase genes from anaerobic bacteria in <i>Clostridium parapurificum</i> and <i>Streptococcus bovis</i> OHMIYA K., MORIMOTO K., TAGUCHI H., KAWASE M., KIKUTA T., KIMURA T., SAKKA K.	S49
Pectinases in the rumen bacteria <i>Ruminococcus flavefaciens</i> 17 PALMIERI G., DI LIBERTO D., FERRARA L., FLINT H.J., AURILIA V.	S49
Extracellular α -amylases from human colonic strains of <i>Butyrivibrio fibrisolvens</i> and related Gram-positive anaerobes RAMSAY A.G., SCOTT K.P., FLINT H.J.	S50
A new family of cellulose binding modules from <i>Ruminococcus flavefaciens</i> 17 RINCON M.T., MCCRAE S.I., MARTIN J.C., CHIQUETTE J., SCOTT K.P., FLINT H.J.	S50
Western immunoblot analysis of <i>Ruminococcus albus</i> and <i>Fibrobacter</i> spp. for proteins antigenically similar to scaffoldin modules of <i>R. flavefaciens</i> RINCON M.T., JACOBOVITCH J., MIRON J., LAMED R., BAYER E.A., MORRISON M.	S50
Real-time RT-PCR quantification of cellulase and xylanase genes expression in <i>Fibrobacter succinogenes</i> , a major ruminal fibrolytic bacterium SUAU F., BÉRA-MAILLET C., FORANO E.	S51
A pepD-like peptidase from <i>Prevotella albensis</i> WALKER N.D., MCEWAN N.R., WALLACE R.J.	S51
Sequence analysis and cloning of the <i>dppIV</i> gene from <i>Prevotella albensis</i> in <i>Escherichia coli</i> WALKER N.D., MCEWAN N.R., WALLACE R.J.	S52
 SESSION V: Fermentation (2) – anaerobic metabolism	
Identification of new derivatives of sinigrin and glucotropaeolin produced by the human digestive microflora, using ^1H NMR spectroscopy analysis of in vitro incubations DELORT A.-M., COMBOURIEU B., ELFOUL L., RABOT S.	S55
Butyrate production from lactate by human colonic microflora BOURRIAUD C., AKOKA S., GOUPRY S., ROBINS R., CHERBUT C., MICHEL C.	S55
The growth promoting mode of action of flavomycin in ruminants EDWARDS J.E., WALLACE R.J., MCEWAN N.R.	S55
Effect of tropical forage legumes and the addition of <i>Sapindus saponaria</i> on rumen fermentation and methane release in vitro HESS H.D., MONSALVE L.M., LASCANO C.E., CARULLA J.E., DÍAZ T.E., KREUZER M. ..	S56
<i>Megasphaera elsdenii</i> JCM1772 ^T regulates hyper lactate production in the rat large intestine USHIDA K., HASHIZUME K., TSUKAHARA T., YAMADA K., KOYAMA K.	S56
Effects of antibiotics or acidifiers in feed on rabbit caecal population and metabolism given maize or acorn/sorghum diet ABECIA L., FONDEVILA M., BALCELLS J., BELENGUER A., DECAUX M.	S57
Effects of the intake of condensed tannins on the fermentative activity of sheep rumen liquid AMMAR H., LÓPEZ S., TEJIDO M.L., GONZÁLEZ J.S., RANILLA M.J.	S57

A deletion approach to assess the amino requirements for optimum fermentation by mixed micro-organisms from the sheep rumen ATASOGLU C., GULIYE A.Y., WALLACE R.J.	S58
Influence of fermentable carbohydrates on fermentation in piglet GIT at weaning AWATI A., WILLIAMS B.A., BOSCH M., VERSTEGEN M.W.A.	S58
The effect of dietary fermentable carbohydrates on microbial activity within piglet faeces, studies in vitro AWATI A., WILLIAMS B.A., BOSCH M., VERSTEGEN M.W.A.	S58
Effect of tannins and other secondary plant products on microbial populations and gut function BROOKER J.D., RAKHMANI S., O'DONOVAN L., KRAUSE D.O.	S59
Effect of <i>Saccharomyces cerevisiae</i> CNCM I-1077 on protein and peptide degrading activities of some rumen bacteria grown in vitro CHAUCHEYRAS-DURAND F., FONTY G., MASSÉGLIA S.	S59
Potential health benefit of H ₂ -consuming acetogenic bacteria from the human colon: new nutritional strategy targeting digestive troubles associated with gas production DEL'HOMME C., YAZOURH A., RABOT S., BERNALIER-DONADILLE A.	S60
Efficacy of siesta grazing to improve rumen microbial growth FIEVEZ V., DRAGOMIR C., VLAEMINCK B., DEMEYER D.	S60
Microbial caecal fermentative activity in Iberian or Landrace pigs given maize or acorn/sorghum diets FONDEVILA M., MORALES J., PÉREZ J.F., GASA J.	S61
The effect of oligosaccharides and resistant starch in cat and dog rations on faecal NH ₃ and H ₂ S emission HESTÁ M., JANSSENS G.P.J., DEBRAEKELEER J., DE WILDE R.	S61
Methane release from feeds characterised by different carbohydrates as measured with Rusitec HINDRICHSEN I.K., WETTSTEIN H.-R., MACHMÜLLER A., SOLIVA C.R., MADSEN J., KREUZER M.	S61
An extract of <i>Moringa oleifera</i> seeds modulates protein fermentation by rumen microbes in vitro HOFFMANN E.M., MUETZEL S., BECKER K.	S62
Are ruminal bacteria protected against environmental stress by plant antioxidants? HOLOVSKÁ K., LENÁRTOVÁ V., HOLOVSKÁ K., PRISTAŠ P., JAVORSKÝ P.	S62
Effect of dietary supplementation of Japanese horseradish on methane production, rumen fermentation and digestibility in steers ITABASHI H., MOHAMMED N., AJISAKA N., LILA Z.A., HARA K., MIKUNI K., HARA K., KANDA S.	S63
In vitro study of isomerisation and biohydrogenation of polyunsaturated fatty acids (PUFAs) in the rumen JOUANY J.-P., LASSALAS B.	S63
Gas pressure inside a rumen in vitro system stimulates the use of hydrogen JOUANY J.-P., LASSALAS B.	S64

The effect of sample processing on gas production kinetics for four different maize silages KAMALAK A., EKINCI M.S., GURBUZ Y., KARAMAN M., OZKOSE E.	S64
The antioxidant enzyme activity of <i>S. bovis</i> LENÁRTOVÁ V., HOLOVSKÁ K., HOLOVSKÁ K., JAVORSKÝ P.	S64
Effect of essential oils on ammonia production by rumen microbes McEWAN N.R., GRAHAM R.C., WALLACE R.J., LOSA R., WILLIAMS P., NEWBOLD C.J.	S65
Effect of essential oils on protein digestion in the rumen McEWAN N.R., GRAHAM R.C., WALLACE R.J., LOSA R., WILLIAMS P., NEWBOLD C.J.	S65
Influence of dipeptidyl peptidase inhibitors on peptidase activity, growth and ammonia production by ruminal microorganisms McKAIN N., WANG H.R., WALLACE R.J.	S66
Effect of gliotoxin, an <i>Aspergillus fumigatus</i> mycotoxin, on rumen microbial fermentation in vitro MORGAVI D.P., BOUDRA H., GRAVIOU D., JOUANY J.-P., MICHALET-DOREAU B.	S66
The effect of tyrosine supplementation on the production of <i>p</i> -cresol by monocultures of the gut microflora during in vitro batch fermentations NEYSSENS P., DEGEEST B., VANSIELEGHEM W., POT B., DE VUYST L.	S67
Propionate uptake by rumen microorganisms NOZIÈRE P., GACHON S., MARTIN C., DOREAU M.	S67
Rumen microorganisms are not almighty in protein nutrition of ruminants ONODERA R., WADUD S., OR-RASHID M.M.	S68
Effects of malate on in vitro rumen fermentation of cereal grains RANILLA M.J., CARRO M.D., MESIÀ J.	S68
Distribution of liquid- and solid-associated bacterial populations in the Rusitec system: effect of forage to concentrate ratio in the diet RANILLA M.J., CARRO M.D., TEJIDO M.L.	S68
The nutritional importance of ruminal bacterial extracellular polysaccharides RODE L.M., NSEREKO V.L., BEAUCHEMIN K.A., MORGAVI D.P.	S69
Effect of ammonia rumen content on proteolysis in ewes, as a consequence of a change in the diet SALES-DUVAL M., BLANCHART G.	S69
Influence of pattern of energy supply on the degradability of grass and microbial numbers in the rumen simulating fermentor Rusitec TEJIDO M.L., GULIYE A.Y., LÓPEZ S., WALLACE R.J., NEWBOLD C.J.	S70
Effect of supplementing a high fibre basal diet with two N sources (ammonia and soyabean protein) on microbial growth in the rumen simulation fermenter Rusitec TEJIDO M.L., RANILLA M.J., LÓPEZ S., BODAS R., CARRO M.D.	S70
Effect of crude fibre content in grass silage on milk odd-chain fatty acids VLAEMINCK B., BRUINENBERG M.H., FIEVEZ V., RAES K., DEMEYER D.	S71
Effect of daidzein on in vitro fermentation of micro-organisms from the goat rumen ZHU W.-Y., MAO S.-Y., WANG Q.-J., YAO W., LIU Q., THEODOROU M.K.	S71

SESSION VI: Eukaryotes and archaea

Rumen ciliate protozoa	
DEHORITY B.A.	S75
Characterisation of XYNB, a modular xylanase from the ruminal protozoan <i>Polyplastron multivesiculatum</i>	
DEVILLARD E., BÉRA-MAILLET C., FLINT H.J., SCOTT K.P., NEWBOLD C.J., WALLACE R.J., JOUANY J.-P., FORANO E.	S75
Cryopreservation of rumen ciliate protozoa; creation of a European bank of cryopreserved ciliates	
NSABIMANA E., KIŠIDAYOVÁ S., MACHEBOEUF D., JOUANY J.-P.	S75
Diversity of rumen ciliates revealed by 18S ribosomal DNA analysis	
MOON-VAN DER STAAY S.Y., VAN DER STAAY G.W.M., JAVORSKÝ P., JOUANY J.-P., MICHAŁOWSKI T., NSABIMANA E., MACHEBOEUF D., KIŠIDAYOVÁ S., VÁRADYOVÁ Z., MCEWAN N.R., NEWBOLD C.J., HACKSTEIN J.H.P.	S76
Understanding the molecular ecology of the rumen fungi – a DGGE approach	
NICHOLSON M.J., KIM E.J., THEODOROU M.K., BROOKMAN J.L.	S76
Novel group of archaea recovered from 16S rRNA clone libraries prepared from ovine rumen contents	
WRIGHT A.-D.G., WILLIAMS A.J., BAKER S.K.	S77
Methanogens in kangaroos	
BAKER S.K., SCHOEP T., EDWARDS N.J., WRIGHT A.-D.G.	S77
The role of the ciliate <i>Eudiplodinium maggii</i> in starch digestion in the rumen	
BELŻECKI G., MICHAŁOWSKI T.	S78
Ruminal fermentation characteristics and protozoal population in induced latent acidosis	
BROSSARD L., MARTIN C., DURAND-CHAUCHEYRAS F., MICHALET-DOREAU B.	S78
Viability of <i>Entodinium caudatum</i> cultures, estimated by fluorescence microscopy	
DE LA FUENTE G., FONDEVILA M., CEBRIÁN J.A.	S78
Why cannot some species of protozoa grow in the rumen?	
JOUANY J.-P., NSABIMANA E., KIŠIDAYOVÁ S., MICHAŁOWSKI T., MACHEBOEUF D.	S79
Electromigration of rumen ciliate protozoa	
KIŠIDAYOVÁ S., VÁRADYOVÁ Z.	S79
Codon bias in the rumen ciliates	
MCEWAN N.R., MCINTOSH F.M., JOUANY J.-P., NSABIMANA E., MACHEBOEUF D., NEWBOLD C.J.	S80
Transfer RNA molecules in the rumen ciliate <i>Entodinium caudatum</i>	
MCEWAN N.R., MCLEOD L.A., NEWBOLD C.J.	S80
Effect of dietary fibre and calcium content on methane inhibition by myristic acid in sheep	
MACHMÜLLER A., SOLIVA C.R., KREUZER M.	S80

The effect of microfauna composition on the fibrolytic enzyme activities, bacterial mass and fibre disappearance from the rumen of sheep MICHAŁOWSKI T., BELŻECKI G., KWIATKOWSKA E., PAJĄK J.J.	S81
Some factors affecting growth of the rumen ciliate <i>Epidinium caudatum f. fasciculus</i> in vitro MILTKØ R., KASPEROWICZ A., WERESZKA K., MICHAŁOWSKI T.	S81
Identification of rumen protozoa by PCR-RFLP NEWBOLD C.J., DEHORITY B.A., SYLVESTER J., FIRKINS J., MORRISON M., YU Z., VAN DER STAAY G., HACKSTEIN J.H.P., PRISTAŠ P., KIŠIDAYOVÁ S., JOUANY J.-P., MICHAŁOWSKI T., MCEWAN N.R.	S82
Saponin fractions in <i>Sapindus rarak</i> : effects on rumen microbes NINGRAT R.W.S., GARNSWORTHY P.C., NEWBOLD C.J.	S82
Molecular ecology of anaerobic fungi OZKOSE E., DAVIES D.R., EKINCI M.S., THEODOROU M.K., GRIFFITH G.W.	S83
Methanogen growth on formate in batch culture RAE S.M., BAKER S.K.	S83
Rapid identification of rumen protozoa by restriction analysis of amplified 18S rRNA gene REGENSBOGENOVA M., PRISTAŠ P., KIŠIDAYOVÁ S., MICHAŁOWSKI T., JAVORSKÝ P., MOON-VAN DER STAAY S.Y., VAN DER STAAY G.W.M., HACKSTEIN J.H.P., NEWBOLD C.J. ...	S84
Isolation and identification of rumen anaerobic fungi from sheep in Iran REZAEIAN M., KHOSRAVI A.	S84
Distribution of the anaerobic fungi along the digestive tract of sheep REZAEIAN M., BEAKES G.W., PARKER D.S.	S84
Medium-chain fatty acids and their interaction in suppressing ruminal methanogens and methanogenesis in vitro SOLIVA C.R., HINDRICHSEN I.K., MEILE L., KREUZER M., MACHMÜLLER A.	S85
Effects of combinations of 3-butenic acid and two inhibitors of methanogenesis on in vitro ruminal fermentation UNGERFELD E.M., RUST S.R., BURNETT R.	S85
The fibrolytic activity of the rumen ciliate <i>Diploplastron affine</i> WERESZKA K., MICHAŁOWSKI T., KASPEROWICZ A.	S86
Molecular characterisation of bacterial communities in the guts of marine herbivorous fishes PASCH I., TURNER S., CLEMENTS K., MOUNTFORT D.	S86

YAKULT SPONSORED SESSION: Gut flora and health - new perspectives

Bacterial biofilms in the large intestine MACFARLANE G.T.	S89
Transformation of flavonoids by human intestinal bacteria BLAUT M., BRAUNE A., SCHNEIDER H., SIMMERING R., SCHOEFER L., HERLES C.	S89
Human gut flora and its modulation using functional foods MCCARTNEY A.	S90
Development of the gut flora in the infant: implications for health EDWARDS C.A.	S90

Concluding lecture

Anaerobic metabolism in the gut STEWART C.S.	S91
