## Box 1 Proforma questions

1. How is it supposed to work?
2. How does it actually work?
3. What helps to make it work?
4. What makes it more difficult?
5. What would make it work better?
6. What prompts someone to use it?
7. Does it duplicate something else that's already there?
8. What are the positive impacts?
9. What's its impact on the evaluation outcomes of:
  - a. Co-ordinated care
  - b. Patient dying in place of choice?
  - c. Hospital usage (ie admissions, A&E, parademics)
10. What are the unintended consequences?
11. What do patients/ family carers think about it?
12. What else do we still want to know?
13. Any other comments?
